

ClearBridge Sustainability Leaders Fund

Class I: LCISX Class A: CLSUX Class FI: LCSTX Class IS: LCILX Class R: CBSLX

Multi Cap Factsheet as of September 30, 2023

Investment Overview

Invests in the equity securities of companies that meet the managers' financial and sustainability/environmental, social and governance (ESG) criteria, or that the managers believe are making substantial progress toward becoming a leader in sustainability and ESG policies, with the goal of achieving long-term capital growth. The managers take a broad view of sustainability, including companies that practice environmental stewardship, treat their employees fairly, manage its supply chain responsibly and employ corporate governance practices that are transparent and shareholder-friendly. ClearBridge may also invest in companies that offer product and services that have a positive impact on society, and looks for companies that go beyond doing relatively less harm but also offer solutions to address the negative impact of less responsible companies. ClearBridge brings over 30 years of ESG investing experience to the Fund, resulting in ESG analysis that is fully integrated into the overall security selection research. In addition, shareholder engagement is an integral part of the leadership review; the managers intend to directly engage with management to improve in certain areas as identified by them.

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit www.franklintempleton.com.

Class R	52471Q202	CBSLX	0.00	—	1.37	1.37

Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns. Net expenses reflect contractual fee waivers, expense caps and/or reimbursements, which cannot be terminated prior to 12/31/2024 without Board consent. Additional amounts may be voluntarily waived and/or reimbursed and may be modified or discontinued at any time without notice. Maximum sales charges have been updated as of August 15, 2022, please refer the Fund's prospectus for more information.

With a legacy dating back over 60 years, ClearBridge Investments is a leading global equity manager committed to delivering differentiated long-term results through authentic active management.

What should I know before investing?

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. **Small- and mid-cap stocks** involve greater risks and volatility than large-cap stocks. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. The portfolio is **non-diversified** and may invest in a relatively small number of issuers, which may negatively impact the fund's performance and result in greater fluctuation in the value of the fund's shares. The managers' **environmental, social and governance (ESG) strategies** may limit the types and number of investments available and, as a result, may forgo favorable market opportunities or underperform strategies that are not subject to such criteria. There is no guarantee that the strategy's ESG directives will be successful or will result in better performance. These and other risks are discussed in the fund's prospectus. These and other risks are discussed in the fund's prospectus.

Glossary

Beta A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. **R-squared** measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1 implies perfect linear relationship and zero implies no relationship exists. **Sharpe Ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Alpha** is the annualized percentage difference between a portfolio's actual returns and its expected performance given its level of market risk, as measured by beta. **Information Ratio** In investing terminology, the ratio of expected return to risk. Usually, this statistical technique is used to measure a manager's performance against a benchmark. This measure explicitly relates the degree by which an investment has beaten the benchmark to the consistency by which the investment has beaten the benchmark. **Tracking Error** measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error. **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.
